Leadership of the MedViz cluster (<http://www.medviz.uib.no>)

MedViz is a Research & Development consortium between Haukeland University Hospital, University of Bergen and Christian Michelsen Research. MedViz is a cooperation of groups performing interdisciplinary research in advanced image analysis and visualisation bridging the gap between "bench and bedside". The overall goal is: Better images – better therapy. The objective of MedViz is to create a strong chain from basic research and education to biomedical and clinical applications where new technology is used to improve diagnosis and treatment of patients. MedViz is aiming at developing new clinical methods for potential commercialisation by means of *denovo* software for analysis, decision support and visual communication. MedViz also includes imaging physics and fundamental biomedical translational research.

MedViz is a cluster of research groups from many institutes at UoB: Mathematics, Informatics, Physics and Technology, Biomedicine, Medicine and Surgical Sciences. The Molecular Imaging Center (MIC) is a National technology platform and also part of the MedViz network. At Haukeland University Hospital there are researchers from many Departments and Centres: Dept. of Radiology, The PET/CT Centre, National Competence Centre for Functional MRI, National Centre for Ultrasound in Gastroenterology, Dept. of Medicine, Dept of Surgery, and Dept of Oncology and Medical Physics. CMR Computing is well known for its state-of-the art solutions in advanced data visualisation. MedViz also has collaborators in industrial companies like Nordic Neuro Lab, GE Vingmed AS and SURF Technology.

Gilja was one of the founders of MedViz and has since the establishment in 2007 been its chairman and director. The main responsibility has been to design visions and goals, chair the leadership committee, stimulate to interdisciplinary research in the three organisations, secure funding, and run MedViz on a daily basis. Furthermore, Gilja has organised and chaired seven MedViz conferences.

European Federation of Societies for Ultrasound in Medicine and Biology

EFSUMB is the European Federation of Societies for Ultrasound in Medicine and Biology and has 30 membership countries with over 20.000 members. The Education and Professional Standards Committee considers all aspects of medical ultrasound education and professional development throughout Europe and publishes recommendations on minimum standards of training in different medical disciplines and specific guidelines in various fields. Gilja has

been chairing the Committee for 4 years and has also started new initiatives: Post-graduate Euroson Schools on contrast-enhanced ultrasound with altogether 12 large European events arranged the last 4 years throughout Europe. Moreover, the establishment of a new Web-portal that offers vast resources in education. Gilja was in 2011 elected Honorary Secretary in the Executive Bureau (ExB) of EFSUMB and in 2013 President Elect.
