UNIVERSITY CLINICAL HOSPITAL NUMER 4, LUBLIN, POLAND

2024 - Present

Trainee Doctor

LANGUAGES

- English
- Polish

PROFILE

I graduated in medicine from the Medical University of Lublin in 2024, and in the same year, I commenced my PhD studies with a thesis entitled "Application of diagnostic imaging in the prediction of cerebral hyperperfusion syndrome."

My academic path has been shaped by a strong commitment to both scientific and organizational activities. I organized ultrasound workshops for SonoTEAM students, attracting over 300 participants from across Poland, and served as Chairman of the Organizing Committee for two major scientific events: the 9th Lublin International Medical Congress, which hosted 400 attendees, and the 8th Novel Medical and Diagnostic Procedures (NoMAD 2024) radiology conference.

My main scientific and clinical interests lie in radiology, which I have pursued through numerous presentations at national and international congresses, including GEST 2022 and 2023; CIRSE 2022 and 2023; ECIO 2023; WFUMB 2023, and EUROSON 2024.

To date, I am the author or co-author of 15 peer-reviewed publications with a total Impact Factor of 30.600. Additionally, I have served as principal investigator in two research projects funded by the Polish Ministry of Education and Science.
