Antonio Picardi

Direttore Medicina clinica ed Epatologia
Professore Associato di Medicina interna
Università Campus Bio-Medico di Roma
Fondazione Policlinico Universitario Campus Bio-Medico

Liver ultrasound has undergone continuous growth in recent years, because of the introduction of new technologies, the development of elastosonography and the wider use of bubbles.

Performing a liver ultrasound correctly, means to make an early diagnosis and improving treatments and survival of the patients. The proposed training course aims to share the professional experiences of the experts involved, and the more recent advances in liver ultrasound.

The course provides theoretical sessions with interactive lectures in the classroom and practical sessions live or in Simulation Center.

Certificate Awarded

Participants will receive a Certificate of Attendance issued by the Università Campus Bio-Medico di Roma.

Course Venue

Cu.Bo building

Università Campus Bio-Medico di Roma
Via Regdo Scodro, 42 - 00128 Roma

Detailed Program Friday 11 September

08.00 Registration & Welcome Coffee

08.45 Institutional Greetings

SESSION I - From normal liver to liver diseases

09.00 Normal liver, biliary tree, spleen and pancreas
Fabrizio Pizzolante

09.30 Chronic liver diseases: “old hepatitis” and “new hepatitis (autoimmune, metabolic)”. US signs
Giovanni Galati

10.00 Cirrhosis and portal hypertension
Matteo Garcovich

10.30 Coffee break

SESSION II - A message from Africa, focal liver lesions and multiparametric liver US

11.00 African perspective of liver diseases and role of US
Jasdeep Bahra

11.30 Benign focal liver lesions: usual and uncommon lesions. Interactive clinical cases with contrast enhanced ultrasound
Paolo Gallo

12.00 Malignant focal liver lesions: interactive clinical cases with contrast enhanced ultrasound
Giuseppina Pacella

12.30 Multiparametric liver ultrasound: attenuation, viscosity, elastography
Ioan Sporea

13.00 Lunch

SESSION III - A message from Asia-Pacific region: not only liver, and interventional procedures

14.00 Application of Contrast-Enhanced Ultrasound and interventional puncture in the diagnosis of pancreatic tumors
Wei Xi

14.30 Interventional liver ultrasound: biopsy from hepatologist’s perspective
Giovanni Galati

15.00 US guided thermal ablation in Europe
Rosario Grasso

15.30 The evolution of US-Guided Tumor Ablation: from local therapy to a central pillar of interventional oncology
Shiina Shuichiro

16.00 Vascular diseases in hepatology: the role of US
Alina Popescu

16.30 What about the spleen? The role of US for hepatologist
Christian Kielisch

17.00 Questions and answers and take-home messages
All relators

17.30 Discussion

18.00 End of the first day

Detailed Program Saturday 12 September

09.00 Practical Session with real cases

13.30 Closing Remarks
