2026

Dear Colleagues,

Ultrasound contrast media has revolutionized the field of ultrasound like no other imaging innovation before. **This International CEUS Course is designed with four key objectives in mind:**

1. To provide a solid understanding of the fundamentals of Contrast-Enhanced Ultrasound (CEUS), including ultrasound systems and optimal settings.
2. To explore the diagnostic advantages of CEUS in both hepatic and extrahepatic pathologies.
3. To demonstrate the application of CEUS in guiding and monitoring interventional procedures.
4. To demonstrate in workshops Tips and Tricks and additional discuss with experts inactive clinical cases in small groups on the ultrasound system in the industry booths.

An esteemed faculty of national and international experts—recognized for their significant experience and contributions to the field of CEUS—will share a wealth of practical insights that can be immediately applied in clinical practice. Comprehensive lectures covering core applications and the latest scientific developments will be complemented by interactive case-based workshops.

October
2026

Each morning, the course will feature a live stream between Europe and China, facilitating global collaboration and knowledge exchange. In the afternoons, due to time zone differences, sessions will continue with expert lectures from our European and American faculty. The entire conference will be recorded and made available on-demand via the EFSUMB website.

An industry forum of the leading companies in this field will inform you about the latest and upcoming technical developments. Additionally, we will have a hands-on workshop with clinical cases at the industry booth.

We think you will benefit from attending this course which again is supported by the EFSUMB and WFUMB (European/World Federation of Societies for Ultrasound in Medicine and Biology).

We wish you a successful educational course and a joyful stay in Munich and wherever you join us in China or elsewhere.
